WORKSHOP OVERVIEW

PDS and Iperion are tailoring this workshop for just 30 delegates to find the right formula for ISO IDMP to suit your requirements.

The Workshop is all about talking through your problems with IDMP and creating solutions to make sure you work to standard implementation guides.

This Workshop is not about talking at you, it's talking with you to ensure you leave with an idea of how to work through the next stage of your IDMP plans.

The first part of the morning will be all about the services we can offer to help you and after a networking lunch there will be an opportunity for everyone to discuss their questions and concerns.

TARGET AUDIENCE

- Drug Safety Senior personnel
- Regulatory Senior personnel
- XEVMPD Managers
- ISO IDMP Managers
- IT & people involved in master data management
